ABOUT US

The "Thames River Anglers Association"

The TRAA works at a Grassroots Level Within the Thames River Watershed to:

- Protect, enhance and regenerate a viable, multispecies, year round fishery.
- Promote and participate in environmental cleanup, pollution control and rehabilitation.
- Breed, relocate and stock to reestablish or augment appropriate species of fish.
- Promote environmentally sound sport fishing practices.
- Form partnerships with community businesses, government agencies, special interest groups, landowners, and other stakeholders in the Thames River watershed.
- Increase public awareness of the unique diversity of the Thames River Watershed, its challenges, its recreational opportunities and its vital importance to our community

More About The TRAA

In 1986 the TRAA was established by anglers concerned with the state of the fishery in the Thames River watershed, particularly the dwindling smallmouth bass population in the North Thames River.

The TRAA is not a fishing club, although most members are anglers and share fishing as a common interest. We are a volunteer "hands on" environmental group.

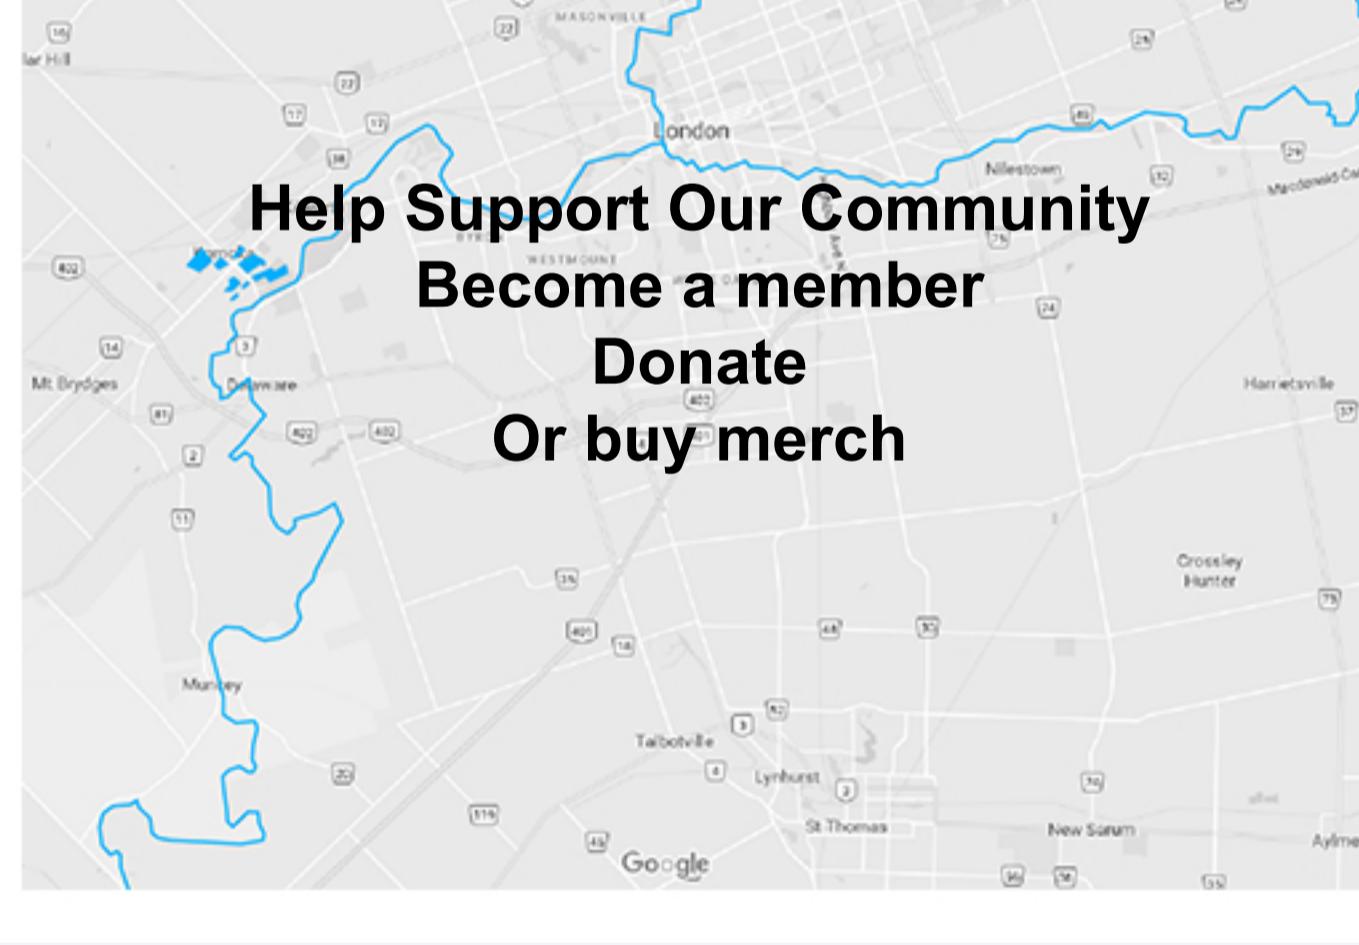

Governed by a formal constitution and by-laws. An elected Executive, with the guidance of the General Membership, sets the policies and direction for the TRAA.

The TRAA has a history of always having a core group of active members supported by those who just want to be part of the solution. Either way, every member of the TRAA is active in their advocacy for the health of the Thames River watershed and its inhabitants.

"Hands-on Environmentalism" is what we do ...

This is what sets the TRAA apart from other clubs and organizations. You'll find us right in the water clearing obstructions from streams, measuring returning salmonids & taking scale samples for DNA analysis, education through trout hatchery tours & stream walks, being a voice for the Thames River watershed & its inhabitants and the list goes on.

Proud supporter of local schools and community. We are always happy to educate the community of our delicate ecosystem and the efforts we take in order to preserve it.
